SQUARE BALER

مربع بیلر

Our rectangular balers are machines easy to use and ideal for small and medium-sized farm users. They are available with double twine binding, they produce dense and well-shaped balers preserving forage qualities and meet the specific requirements for animal feeding.

AGM-EP-800 model is a chain transmission machine, AGM-EP-900 model has both chain and cardan shaft transmission. All machines are provided with light kit for road circulation. Grease lubricated knotters.

STANDARD HYDRAULIC PICKUP LIFTING AND BALE COUNTER

More productivity and less time wasting. Using the hydraulic pick up lifting, you can adjust the height adapting it to the soil's conditions and you do not have to get off the tractor. So you will save time and gain ease of use All machines are standard equipped with bale counter.

ADJUSTING REAR SPRINGS

The bale density can be adjusted manually by using two adjusting springs, this allows the operator to choose the pressure on the product depending on its needs and then to reach the bale weight needed.

Fan for twine binder cleaning

Rear wheel to help working on field with furrows

 Model	 Chamber size	 Ram Stroke	 Picking width	 Two twine binder	 Lubrication oil system for binder	 Bale counter	 Weight
AGM-EP-800	36x36 cm (14.2x18.1 in)	92/min	170 cm (66 in.)	STD	Optional	STD	1760 Kg (3900 lbs.)
AGM-EP-800	36x36 cm (14.2x18.1 in)	92/min	170 cm (66 in.)	STD	Optional	STD	1760 Kg (3900 lbs.)
